E-mail: cclark@utah.gov

The Automated Geographic Reference Center (AGRC) offers a service to plot maps and/or graphics on a Mylar film. These plots are 36 inches wide and as long as needed.

Product Features and Descriptions

Feature	Description
Mylar Plots	Production of Mylar maps and/or graphics in accepted standard printing formats. Standard formats are JPEG, TIFF, PDF, GIF, EMF, EPS, AL, SVG, BMP, PNG.

Features Not Included

Feature	Explanation
Mylar Plots	Production of Mylar maps and/or graphics in non-standard printing formats.

Rates and Billing

Feature	Description	Base Rate
Mylar Plots	Plots on Mylar product will be assessed at a running foot, 36 inches wide.	\$8.00 a running foot

Ordering and Provisioning

To order, notify Cindy Clark, 537-9201 or cclark@utah.gov, with the plot request, dimensions of the plot, and time frame for deliver of goods.

DTS Responsibilities

AGRC will accept the job with stipulations concerning the time frame for delivery. If the time needed for delivery is beyond the capabilities of the plotting of map or graphic, the AGRC will notify the requesting agency.

Agency Responsibilities

The Agency will allow for adequate time for the AGRC to be able to plot said map or graphic, noting that within the AGRC, the regular daily business requires the use of the plotter, and there may be a queue for the use of the plotter. Agency should create plots in desired dimensions and in the before mentioned standard printing formats.

Service Levels and Metrics

Plots are available for printing from 7:00 to 6:00, Monday through Thursday. Customers are surveyed for quality and satisfaction for each plot.
